New York, NY | 716-495-6874 | tanmayjana2810@gmail.com | linkedin.com/in/tanmayjana2810

Analytics consultant with an M.S. in Data Science and hands-on experience cleaning and transforming data, building data models, and creating visualizations that communicate insights to clients. Skilled in SQL, Python, Tableau, and Power BI, with experience applying analytical techniques to identify trends and inform business decisions. Comfortable collaborating with clients to understand their objectives, translating complex data into clear recommendations, and delivering work on schedule in a consulting environment.

Skills

Data & SQL	Advanced SQL, data transformation and cleaning, dimensional data modeling, data warehousing, data views, ETL pipelines, PostgreSQL
Programming	Python (data wrangling and automation, pandas, NumPy), R (familiar)
Cloud & Warehousing	Google Cloud Platform (GCP), BigQuery; exposure to Snowflake, Databricks
Analytics & BI	Tableau, Power BI, dashboard and report design, statistical and analytical techniques (regression, clustering, decision trees), analytical model development and validation, Excel
Consulting	Client requirements gathering, systems and solution design, stakeholder collaboration, translating data into insights and recommendations, project and timeline management

Experience

University at Buffalo - Experiential Learning Project (industry partner: Ganson Street)	Buffalo, NY
<i>AI & Data Science Project Associate</i>	Jan 2026 to May 2026

- Built components of an enterprise workflow automation platform in Python, working directly with an industry partner to understand their objectives and translate them into a working solution
- Developed a Governance & Policy Agent that reads structured and unstructured documents, extracts rules, and evaluates compliance with clear, explainable output
- Implemented document processing and retrieval pipelines to structure and organize unstructured data for analysis, achieving 90%+ retrieval accuracy on test documents
- Tested and validated system output against real documents to confirm accuracy before delivery

HighRadius Technologies - Global Fintech / Enterprise SaaS	India
<i>Consultant Intern - Data & Implementation</i>	Jul 2023 to Nov 2023

- Cleaned, transformed, and validated large client datasets using SQL and Excel, structuring data for accurate, usable analysis across multiple client engagements
- Applied analytical techniques to identify trends, drivers, and exceptions in client data, informing recommendations that supported business decisions
- Collaborated with clients to understand their business needs and objectives, identifying areas for improvement in client processes and recommending changes to support their outcomes
- Maintained data views and documentation, delivering work on schedule while managing multiple client priorities

HighRadius Technologies	India
<i>Product Consulting Intern</i>	May 2023 to Jun 2023

- Completed an intensive consulting and business-essentials program, analyzing corporate workflows and building client-facing case studies that translated data into practical recommendations

Projects

Data Modeling & ETL Pipeline - E-Commerce System	PostgreSQL, Python, SQL
---	-------------------------

- Designed a normalized relational schema (six related tables) and built an automated pipeline cleaning and transforming ~127K records per table into PostgreSQL, then wrote analytical SQL queries and views to organize data for reporting

Business Analytics - Mapping the Pulse of NYC's Businesses	SQL, Python, Tableau, Power BI
---	--------------------------------

- Analyzed ~1,900 business records to identify trends, segments, and outliers across categories and geographies, translating findings into clear, decision-ready insight
- Built Tableau and Power BI dashboards and reports communicating complex analysis to clients and non-technical audiences

Education

University at Buffalo (SUNY)	Buffalo, NY
M.S. Engineering Science (Data Science), GPA: 3.53/4.0	Jan 2025 to May 2026

Kalinga Institute of Industrial Technology	India
B.Tech. Computer Science and Engineering, CGPA: 8.63/10.0	2020 to 2024
